WORLD WATER DAY

THEME 2023: "ACCELERATING CHANGE"

World Water day is celebrated every year to raise awareness about the importance of fresh water, as well as advocating for sustainable management of freshwater resource

Origin

World Water day(WWD) is a celebrated annually on 22nd march, A day close to when the annual World Water Development report released by UN. The UN first commemorated world water day in 1993 and since then more & more countries have celebrated WWD every year

Awareness

The focus of the world water day is to create awareness about the responsible use of water and access to safe water for everyone. This year theme "Accelerating Change" aims to urge governments, civil society, and individuals to accelerate progress toward achieving Sustainable Development Goal 6 and to achieve Water, Sanitation and Hygiene (WASH) objectives by 2030.

**Every drop
Counts, so dont
waste water.
Save water
Save World**

Ways we Can Save water

Turn off the taps while brushing your teeth
Turn off the taps while washing your hands
Turn off your shower while cleaning yourself
Harvest Rainwater

**Join us to celebrate, world water day by learning the
importance of water on 22nd March 2023**

Glimpse of the Awareness Program

22nd March 2023

Created awareness among all the employees about the sustainable use of water and also on the importance of Rainwater harvesting. Employees pledged to conserve water at the factory & at home.
